

air purification services @ a glance

The quality of the air inside your home can have a substantial impact on your health. The EPA reports that 60% of homes and buildings are hazardous to your health because of airborne pollutants. The air quality indoors can be up to 100 times worse than the air outside. A number of serious illnesses such as Legionnaires' disease, asthma, and pneumonitis have been directly traced to the air quality within buildings, along with hay fever and allergies. Why is the air in your home so polluted? In addition to increased pollution, efforts to make homes more energy efficient have resulted in sealed, tightly insulated homes that lack the ability to breathe and expel the stale and polluted indoor air in exchange for cleaner, fresher outdoor air.

the problem

50% of all illness is aggravated or caused by polluted indoor air.

the solution

**purification:
air quality matters**

You can breathe easier with ReensAir's state-of-the-art filtration, UVC disinfection, and fresh-air introduction systems. ReensAir offers you the most technologically advanced air purity system available today to help protect you and your family from the host of pollutants and health hazards present in your home. Our air cleansing product improves air quality by reducing concentrations of pollen, dust mites, dirt, pet dander, bacteria, viruses, mold spore, fungi, gaseous chemicals, odors and other pollutants that are contaminating your home.

why reensair?

ReensAir air purification systems are the most effective and efficient products on the market today. Our fresh-air ventilation system provides the fresh-air feel of an open window, without the energy and heat loss. Air quality is improved with the reduction of chemicals, fumes, carbon dioxide, formaldehyde, radon, cigarette smoke, odors, pet dander, and other contaminants that are present in our homes.

Millions of Americans are needlessly breathing unhealthy amounts of air pollution every day, right in their own homes. There is no reason why your family should be exposed to such unhealthy air. Let ReensAir help you provide your family with the clean, healthy air that they deserve.

60% of homes and offices contain air contaminants that are hazardous to your health.

The air inside your home or office can be up to 100 times more polluted than the air outside.
